

How much does a solar battery cost in Australia?

A guide to solar battery prices and value. Solar battery prices have come down significantly with the introduction of the federal government rebate. The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries.

What is the best solar battery in Adelaide?

The Alpha ESS is a well-rounded solar battery solution offering smart features at an excellent price. It's gaining popularity in Adelaide, originally with its Alpha Smile5 range and more recently its S5-B3 model. The Alpha ESS battery integrates well with existing solar systems or many models can have panels directly connected to them.

How much does a solar battery cost?

Thanks to falling prices and the federal battery rebate, thousands of households can now expect payback within the warranty period, particularly if they use a lot of power at night or join a Virtual Power Plant. In summary: Price Range: Popular solar batteries have an installed cost between \$8,000 and \$13,000 including the federal rebate.

How much does a 10 kWh solar battery cost in Australia?

The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries. A newer technology, battery storage has been viewed as expensive - especially when comparing the payback of a battery system against its expected life.

Are batteries worth it in Australia?

We've been tracking the financial return of batteries in Australia for over a decade and regularly update our analysis of whether batteries are worth it. At the midway point of 2025 was a key turning point in this equation as the federal battery rebate was introduced which offers a discount of around 30% for a typical 10kWh battery.
