

Do you need a solar battery in Newcastle NSW?

When you call Newcastle Solar Power for solar installations, our team would usually recommend options for batteries Newcastle NSW. A solar battery allows you to store excess energy absorbed by your solar panels so that you can use it after sunset, on cloudy days, and even during power outages.

Who is battery solar solutions?

Battery Solar Solutions uses and recommends battery storage units from leading manufacturers. We strive to deliver clean, reliable and affordable energy solutions for south australians. Our high quality solar components are perfectly tuned to fit all your solar energy needs. We currently offer three types of battery storage systems.

Do Hunter Solar Solutions sub-contract?

Unlike the majority of solar companies we do not sub-contract our installations, every Hunter Solar Solutions install is completed by our team. Hunter Solar Solutions provides residential and commercial solar panel systems to homes and businesses in Newcastle, Lake Macquarie and across the wider Hunter region.

What is solar battery storage & how does it work?

Solar batteries are revolutionising home solar power systems. Battery storage enables more families to use renewable energy to power their day-to-day lives. The result is greater self-consumption of solar generation and reduced energy costs. From 2.5kWh to 15kWh, any home situation can be covered.

What type of battery does a solar panel use?

Solar batteries typically use one of three chemical compositions: lead acid, lithium ion, and saltwater. However, lithium ion batteries are the most common and best option for a solar panel system, though other battery types can be more affordable. How much does a solar battery cost? What is the biggest solar battery?

Are solar rebates a good idea?

Government incentives for solar rebates offer numerous benefits. Significantly they reduce the initial cost of solar panel installation, making renewable energy more accessible to homeowners & businesses. These rebates encourage the adoption of clean energy, which will lower greenhouse gas emissions and combat climate change.
