

How much does a solar battery cost in the UK?

Solar battery prices in the UK range from £3,500 to £10,000, yet they offer a dependable power source during dark winter nights by storing excess energy from the daylight hours. Our comprehensive guide ensures you have the necessary insight on solar battery prices, grants, and savings opportunities to make an informed decision confidently.

How much does a solar system cost in the UK?

When factoring in solar panel costs in the UK, the average 4kW solar system with battery price, for a 3-bedroom house, could reach £13,000 to £15,500. On the other hand, pairing a 5kW solar system with a battery can cost around £16,500 - £18,500. As you can see, the prices increase the larger your solar system size is.

Is a Solar Storage Battery Worth It in the UK?

A solar storage battery is well worth having in the UK. If you add a battery to your solar panel system, you can use much more of the electricity your panels produce. This is because a battery stores any excess energy your solar panels produce when the sun shines, so you can use it to power your home after dark.

How much does it cost to install a solar battery?

The price of installing a solar battery falls by around £2,000-£3,000 if it's installed at the same time as solar panels. The price of the inverter is already folded into the total amount of a solar panel system installation, and adding a battery doesn't involve much additional labour cost either.

How much does a battery cost for a UK Home?

The average price of a battery for a UK home is £5,000. Prices vary according to factors including a battery's capacity, lifespan and brand name. You can also cut the cost of solar panels and a battery by having them installed at the same time. Read on for the full lowdown on costs and savings.

How can I reduce my solar panel battery cost in the UK?

There are currently solar panel funding opportunities which can significantly decrease the solar panel battery cost in the UK. Through the Smart Export Guarantee (SEG) you can earn money for exporting your excess solar energy back to the grid. Export tariffs vary with each energy supplier, but a good tariff is between 4-20p/kWh.
