

Is your solar PV system out of business in Wrexham?

Many existing Solar Pv installation companies have already gone out of business in Wrexham but we can still look after you and your solar system. Red light and fault messages on your inverter indicate a problem with your solar system and could be costing you money through no electric being produced.

Will a new solar farm be built in Wrexham County Borough?

Plans to create a new solar farm and battery storage facility in Wrexham County Borough look set to be given the go ahead.

How do battery storage systems work in Wrexham?

The battery storage systems that we supply in Wrexham come with integrated software inside the inverter that allows such grid charging to take place. By selecting the cheapest rate time slots you want the batteries to charge, you can control the cost of electricity used in your home.

What is battery storage for solar panel installations?

Battery storage for solar panel installations allows the storage of excess solar that is generated throughout the day. Battery storage allows you to benefit from smart tariffs providing cheaper night rates of electricity to charge your batteries.

Why do I need a remote survey for solar panels & battery storage?

When we carry out a remote survey for solar panels and battery storage we need to find your property online using Google maps so we can measure the roof space/area for consideration, this ensures we design the system to perform as efficiently as possible.
