Stihl battery charger solid green light

Will a Stihl 36 volt lithium ion battery charge if temperature is below 50?

Recently I noticed that my Stihl 36 volt lithium-ion batteries will not chargeif the temperature is below 50 degrees Fahrenheit and if the temperature is over 80 degrees Fahrenheit then I have to let the batteries cool off before they will charge. Obviously I am unimpressed with that kind of useful temperature range.

How do I know if my Stihl battery is charging?

Monitor the charging process: The charger will indicate the charging status of the battery. A flashing green LED lightusually indicates that the battery is being charged, and when the charging is completed, all green lights will turn off. Avoid overcharging: With the use of an approved STIHL charger, overcharging is not possible.

Why is my Stihl battery flashing green?

The instruction manual contains safety instructions and supports you in using your STIHL product in a safe and environmentally friendly manner over a long service life. 1 LED flashes green: The state of charge of the battery is too low. Please charge your STIHL battery as described in the STIHL charger operating instructions.

How do I charge a Stihl battery?

Plug in the power cord: Connect the charger's power cord to a suitable power outlet. Insert the battery: Insert the STIHL battery into the charger, making sure it is securely in place. Monitor the charging process: The charger will indicate the charging status of the battery.

Are Stihl batteries safe?

The heat generation within the battery becomes self-reinforcing, sparking a circular chain reaction which quickly melts the battery core. It is true that the risk of battery fire continues to be a matter of concern for many users. However, advanced STIHL batteries keep you on the safe side.

Can I overcharge my Stihl Charger?

With the use of an approved STIHL charger (AL 100,AL 101,AL 300,and AL 500),overcharging is not possible. The charger lights indicate: one glowing red light - Battery too hot or too cold; three glowing red lights - Power tool too warm; allow to cool off; three flashing red lights - Power tool malfunction. Contact your Dealer.
