

Who is Sunbank solar?

Sunbank Solar is Australia's largest residential solar battery installer and solar (PV) panel specialist, backed by more than 30 years combined industry experience. They provide the latest technology in solar products and ensure a truly personalised installation experience, whether you're new to solar or expanding an existing system.

What is a battery bank for solar panels?

A battery bank allows you to use power generated by solar panels when it is not normally available. A solar array generates power all day, but stops generating once the sun goes down.

Why choose Sunbank solar?

Sunbank Solar is a choice for making solar energy affordable and easy to install with an industry leading warranty. (The passage does not directly answer why Sunbank is a better choice compared to other solar water heater providers.)

Does Sunbank have a solar water heater?

I don't write reviews but I have to tell others about James from Sunbank! We got an 80 gallon solar water heater and installed it ourselves. It works very well in Southern California.

Why did Sunbank Send Me a 'terms & conditions'?

SunBank sent me "their Terms and Conditions" after placing the order - which for supply of a battery was in part irrelevant - demanding that I sign any paper to transfer the credits to them (the original installer had received those credits). And that they had 12 months to provide a battery (any battery!!!!!!).

Are goanna solar batteries a good choice in Australia?

They've also partnered with Alpha ESS Australia on the launch of the Goanna solar battery in Australia, a safe and durable with a great extent of flexibility and very easy to install. It is one of the most cost-effective solar batteries on the Australian market, paving the way for all Australians to access clean, reliable and cost-effective energy.
