

How much does a Tesla Powerwall battery cost?

Based on a secret-shopping quote we acquired on Tesla's website for a home near Austin, Texas, a single Tesla Powerwall 3 battery costs \$16,779. Installation costs vary depending on your installer, but our 2025 survey of 1,000 recent home solar customers revealed that the average price to install a Tesla Powerwall is \$7,466.

How much does a solar battery cost?

Based on data we collected from solar battery manufacturers and third-party sources, the average solar battery costs \$13,455. That's nearly 50% added on to the typical cost of a solar panel system and only for one battery. Most homeowners will need to install two or more, nearly doubling the cost of the panels themselves.

Is Tesla Powerwall a good battery?

The Tesla Powerwall isn't the cheapest battery on the market, but it offers more storage and smart features for the price. While some competitors cost less upfront, they often have lower storage capacity or weaker backup capabilities. On a cost-per-kWh basis, the Powerwall is one of the best values available.

Can you buy a PowerWall with a Tesla Solar System?

You can purchase a Powerwall in combination with a Tesla solar system or Tesla solar roof. You can buy a maximum of 10 Powerwalls per purchase, and the cost per unit decreases when you purchase more batteries. Most homes need only one or two batteries to meet their basic energy storage needs.
