

Who installs solar batteries in Victoria?

Solar storage batteries must be installed by A Grade electricians with a CEC endorsement for solar batteries. Safety is the responsibility of the installer and the manufacturer. Newly installed batteries must also be signed off by a Licensed Electrical Inspector. Solar Victoria's safety inspection program will include battery installations.

Why should you install a solar battery in Melbourne?

Grid Independence: With a solar battery installation in Melbourne, you can achieve greater energy self-sufficiency, reducing your dependence on the utility grid and protecting against power outages.

Does solar Victoria have a safety inspection program?

Solar Victoria's safety inspection program will include battery installations. Solar Victoria also ensures that authorised installers have completed all the required trainings to conduct installations safely. How do I know what the costs/benefits of installing a solar battery will be?

Should Victorians add a battery to their solar PV system?

With the rising cost of electricity, many Victorian households are adding a battery to supplement their solar PV system. Consider whether a battery system is right for you now, or down the track. **Section 2: What incentives are available to Victorians for solar battery systems?**

How do I get a solar installation quote in Victoria?

Contact several Authorised solar retailers for a quote and they will put the quote in the Solar Victoria Retailers Portal. You lodge your eligibility confirmation details in the Solar Victoria Customer Portal and indicate your preferred quote. When your eligibility and loan application is confirmed, your installation can go ahead.

Should you install a solar battery system?

The installation of solar battery systems has become simpler with the development of lithium-ion battery chemistry and streamlined, modular storage systems. A battery system can help some solar households cut their energy bills even further, if the estimated savings on electricity bills are higher than the upfront cost of the system.
