

How much does an off-grid solar system cost?

Prices Slashed on Selected Off-Grid Systems. Limited Time Our new ULTRA off grid solar systems using the latest technology are made in New Zealand and priced from \$15,995 inc GST. The base system sizes below are a guideline only.

What is an off-grid Solar System?

Off-grid living means you have no connection to the electric utility's distribution network. When you go off-grid, you take on the role of the power company, generating and supplying the power to yourself. And a fully functional off-grid solar system is exactly what you need...

What does an off-grid solar package include?

Our off-grid solar packages include everything you need to go off the grid in New Zealand: solar panels, batteries, charge controllers, inverters, cables, and DIY-friendly manuals backed by our lifetime support. Browse through our series below.

How many kWh will a small off grid solar system provide?

Allowing for this, the PS: Tiny off grid solar system will provide an estimated 4kWh per day. The exact number of panels needed depends on your situation. Get in touch and we can check your situation.

What are the limitations of an off-grid Solar System?

All off-grid solar systems have limitations.. This is based on the number of panels, the size of the battery bank, and the capacity of the inverter/s. The PS: Tiny system is a small system for very basic requirements and will not be able to power the following. Attempting to do so may cause damage and void your warranty:

Why should you choose off-grid solar power?

By choosing off-grid solar power, you contribute to a healthier, greener earth with every kilowatt-hour generated. Get complete energy independence for your home or business. Get the best of both worlds with grid-connected solar and battery storage. At Pure Power, we know how important it is to make the right decision for your energy future.
