What are the economic benefits of solar PV with energy storage?

It highlights one of the key economic benefits of solar PV with energy storage to New Zealand - as a replacement for peaking generation, and limiting the size of the transmission and distribution networks.

What is the export limit of solar PV with a battery?

5 kW export limit and 15 kW export limit. It is interesting that the performance of solar PV with a battery is maintained or improved despite there being a 10% energy loss associated with the battery. Figure 36 also shows slightly higher performance with a complex time-of-use buyback price structure.

How are prices used in solar PV modelling?

A range of prices are used throughout the modelling to understand solar PV performance with retail and buyback prices and structures obtainable now and potentially available in the future. Retail prices are covered in Sub-section 3.2.4.1, with buyback prices covered in Sub-section 3.2.4.2.

What is the maximum return for a PV system?

For all load profiles, the maximum return occurs at 10 kW-ac when the export limit is 10 kW. The reason for this is the higher retail peak prices. Larger PV capacities give more self-consumption volume in peak periods, leading to higher revenue in peak periods.
